The Newest Swiss Skin Care line now available in the United States

Sophisticated Swiss biotechnology and essential natural ingredients from the Swiss Alps, combine to make Swissclinical 'Skin Solutions' stand out in the world of beauty.

Swissclinical 'Skin Solutions' is a Swiss-made skin care line that, like most everything else Swiss-made, adheres to the standards of high quality, professionalism and dependability. Formulated by some of the very best dermatologists and cosmetologists in Switzerland, the goal of Swissclinical is to provide "solutions for the skin".

Swissclinical was established in 2006 in Switzerland and made its debut in the United States at the Cosmoprof Las Vegas Tradeshow in July of 2007. As a new entry into the US skin care market, Swissclinical looks to establish itself as a well respected skin care line that focuses on overall skin health, and not just "skin trends".

"The efficacy is amazing and the entire experience of using these products is wonderful! The fragrance, the feel, the effectiveness, everything about this line is outstanding." (Kevin Ledesma, President Swissclinical USA INC.).

There are only 15 products in the Swissclinical line at this time, making it a very compact line that still covers almost all of one's dermatological needs. Easy to use and understand, this product line works to Cleanse and Tone, Correct imperfections, Prevent harmful deterioration and Comfort the skin into a clean, healing and healthy state. Swissclinical is also developing a line of 'sun protection' products, as well as more specialty products for use in Day Spas and Salons.

Free from parabens, colorants, and mineral oils, Swissclinical is not only safe, but it is also "cutting edge." These cosmeceutical formulations offer a very effective and simple solution to daily skin care needs. Safe, clean, and pleasurable, Swissclinical products will surely stand out among today's oversaturated skin care market.
